DETAILED ACTION

1. Claims 1 to 16 are presented for examination.

Response to Amendment

2. Prosecution on the merits of this application is reopened on claims 1 to 16 considered unpatentable for the reasons indicated below:

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 15 and 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 15 and 16 are single means claims and the scope of the claims is not commensurate with the specification.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 to 13 are rejected under 35 U.S.C. 101 because the independent claims (1 and 5) seems to be directed merely to mathematical manipulation and does not produce a tangible and useful result. The language of the claim raises a question as to whether the claim is directed merely to an abstract idea that is not tied to a technology art, environment or machine which would result in a practical application producing a concrete, useful, and tangible result to form the basis of statutory subjected matter under 35 U.S.C. 101.
